BPA Statement	January 1, 2024 – Dec 31st, 2024
Dates Covered:	
Authorized Company Representative:	Brad Blankenship, Technical Manager, Sigma Stretch Film

Bisphenol A (BPA) is a common catalyst used to produce PVC, polycarbonate, and epoxy materials. It is not a component of the polyethylenes used to produce stretch films. All films manufactured and sold by Sigma Stretch film are free of BPA and other endocrine disrupters.
